- **Power BI:** Expertise in report and dashboard creation, advance DAX and transformations in Power Query
- **SQL: T-SQL**
- **Data sources: SQL Server, Excel, CSV.**
- Good knowledge of **Advanced Excel, Word, Power Point.**

PROJECTS :

- **Product Sales Data Analysis**

Businesses should keep detailed records of their sales because these records can provide valuable insight into how well their business is performing, which items are proving successful, and what changes can be made. Using Sales Data Analysis Project, companies are able to keep track of their sales and get answers to all of their questions about how they performed.

- **Customer Churn Analysis**

The business problem is very simple, there is a Bank that wants to retain their existing customers who may churn, for that they have to know which existing customers have the highest probability of leaving the company and which customers have the lowest probability of leaving the company.
