## **Frontiers of ECE**

### **College Vision**

- To be a center of excellence in technical education by using cutting-edge technology that produces competent engineers of today and tomorrow to serve society.

### **College Mission**

- To impart quality education by implementing state-of-the-art teaching-learning methods to enrich the academic competency, credibility and integrity of the students.
- To facilitate a conducive ambience and infrastructure to develop professional skills and nurture innovation in students.
- To inculcate sensitivity towards society, respect for environment and promote high standards of ethics.

### **Department Vision**

- To be a centre of excellence in Electronics & Computer engineering education to prepare professionally competent engineers with lifelong learning attitudes for the accomplishment of ever-growing needs of society

### **Department Mission**

- To prepare technically and professionally competent engineers by imparting quality education through effective teaching learning methodologies and providing stimulating environment for research and innovation.
- To develop professional skills and right attitude in students that will help them to succeed and progress in their personal and professional career.
- To imbibe moral and ethical values in students with concern to society and environment

Dr.Pravinkumar S. Patil (Associate Professor & Head of Department)  
B.E., ME, Ph.D.

“Success and failures are just stepping stones in education. In the end, knowledge stands as prime, leaving everything else immaterial” It gives me an excellent opportunity to unveil the Fifteen issues of the Newsletter of the Electronics and Telecommunication Department. Within the pages, everyone will find news related to various activities of the Department and student association with contributions of the faculty members and students. Through a nice blend of coursework and projects, the Department endows students to apply science, mathematics, and engineering knowledge to work effectively in multidisciplinary teams, provide leadership and technical expertise, and practice engineering with ethical approaches and concern for society and the environment. Our curriculum undergoes regular revisions to ensure local relevance with a global outlook. I hope everyone will find this exciting issue exposed to students and faculties.

**From Faculty Editor Desk:**

**Mrs B. K. Jagtap (Editor):**

Dear reader,

We are pleased to present the E&C Department NewsLetter "**Frontier of ECE**", ECE Messengers. The successful compilation of this newsletter has been made possible through the commendable cooperation and dedicated efforts of the co-coordinators, Heads of Departments, and faculty members, whose contributions are sincerely acknowledged. This issue systematically documents the notable academic, research, and co-curricular achievements of the department, faculty, and students. Furthermore, it provides comprehensive coverage of campus developments, institutional events, and the placement scenario. I gratefully acknowledge the invaluable support and encouragement received, both directly and indirectly, which ensured the timely publication of this NewsLetter.

**From the Student Editors desk:**

Dear readers,

The Department of Electronics and Communication Engineering at SITCOE has consistently demonstrated its ability to successfully meet academic and professional challenges. It is a matter of immense pleasure and pride for us to serve as Student Editors of this issue of ECE Messengers. We are grateful for the opportunity and the confidence reposed in us, which enabled us to contribute meaningfully to the preparation and publication of this newsletter.

## ECESA details (Electronics & Computer Engineering Student Association):

Electronics & Computer Engineering Student's Association (ECESA) tries to improve the personality of every student. This Association helps them achieve the goal of an intellectual and thinking person which in turn helps them in their academic and extracurricular activities. This society provides them with a platform where they can explore their hidden abilities. It allows them to work in a group of members from all the years.

Impetus 2K25 and Place Master 2K25-Technical events are organized every year with the objective to provide a platform for the students to showcase their talent with a competitive spirit. The event was successful enough to attract as many as 1750 participants from Maharashtra and Karnataka state. event completed in one day.

## Guest Lecture Summary/Student Enrichment Program

The modern education system has made guest lecturers an essential part of their learning strategies. Having guest speakers enhances the educational experience of the students. Moreover, it is an excellent way for the students to get maximum exposure. Keeping this aim in mind Electronics and Telecommunication Engineering department organizes various guest lectures.

### Guest Lecture Summary of the Academic year 2025-26 SEM-I:

Sr. No.	Topic for Expert Talk	Expert Name & Designation	Date of Expert Talk	Class	No. of Beneficiaries
1	How to crack IT Jobs	Mr. Aman Kumar SDE, Apple	12/07/2025	FY	92

## **Innovation Centre:**

### **Centre of excellence On VLSI and embedded system design**

This center is established in Association with ESSCI (Electronic sector skills council of India), IEEE (Institute of Electrical and Electronics Engineers), IESA, and Ministry of Skill Development. The Center of Excellence "VLSI and Embedded Systems" is the first lab in the entire Maharashtra region and 3rd in India. The main aim of this center is to upgrade the skills among faculties, students, and non-teaching staff by providing appropriate training and to bridge the gap between industry and academia.

### **Centre @SITCOE:**

In this center of Excellence, the software tools are provided by Mentor Graphics (A Siemens Business) which worth a price of Rs. 60 Crore. Some of the tools and software which are provided are Capital, Board Stations, Hyperlink Advanced, Hyperlink VRC, Source R.Y. Code Bench, etc.

Certification will be certified by the Ministry of Skill Development and ESSCI.

### **Benefits to the Students:**

- Students will learn updated tools that are currently used in the ESDM sector.
- Students will get placement benefits in the ESDM sector after the successful completion of training.
- Students acquire the knowledge of making the startups.
- Students will be upgraded with the appropriate skill set.

### **Activities Conducted in Center of Excellence VLSI AND EMBEDDED SYSTEM DESIGN:**

#### **1. Texas Instrument Lab**

Exposure to state-of-the-art technology through hands-on learning experience by using Microcontrollers such as MSP430 LAUNCH PADS, TIVA LAUNCH PADS, Educational Booster Pack MKII

#### **Objective:**

To utilize the launch pad and booster packs kits which are up gradated versions of recent microcontrollers by Electronics & Telecommunication Engineering Students to develop an innovative project. Better employability opportunities for students in embedded system domain companies

As the need for industry base knowledge is the prime requirement for now-a-day Engineering students. Keeping this view in mind SITCOE, Yadrav-Ichalkaranji is striving hard to give a lot of project-based and industry-based training to students by arranging different workshops and training for students.

#### **3. PCB & Wireless Sensor LAB**

##### **PCB Design:**

PCB design and development is one of the important steps in product or system development for all electronics-based gadgets, automobiles, machines, and equipment. The lab setup provides a facility for PCB development required for project work. Wireless Sensors are also made available for developing

various Real-Time applications in various sectors like environmental monitoring, home automation, public safety, and health care systems.

Wireless Sensor networking plays a crucial role in designing and developing various Real-Time Implementation of projects in various sectors like environmental monitoring, home monitoring, and patient monitoring, and various sectors. Students used different modules for their projects.

**Objectives :**

- Give the student & faculty easier access to state-of-the-art electronics technologies.
- Assist with integrating new electronic technologies into research programs.
- Transfer those technologies to the users when economical.
- Provide cradle-to-grave support for ongoing research or transitioning to commercialization

**E-Yantra Lab**

*E-Yantra* (stylized as **e-Yantra**) stands as a robotics-focused educational outreach initiative originating from the Department of [Computer Science and Engineering](#) at the [Indian Institute of Technology, Bombay](#). Supported by the [Ministry of Education, Government of India](#), under the National Mission on Education through ICT (NMEICT), its primary objective is to supplement prevailing engineering and robotics higher education frameworks globally. The initiative aims to cultivate engineers equipped with the prowess to address local challenges spanning various domains including [agriculture](#), [disaster response](#), defense, [manufacturing](#), [home automation](#), [smart cities](#), and [service industries](#), leveraging technological innovations

### Mini Project:-

We implement project-based Learning. In this, students did various mini-projects using different techniques. With this approach, students actively explore real-world problems and challenges and acquire more profound knowledge. Project-Based Learning is a teaching method in which students gain knowledge and skills by working for an extended period to investigate and respond to an authentic, engaging, and complex question, problem, or challenge.
